

Message from Editor-in-Chief

Dear Colleagues,

The Pan Arab Journal of Neurosurgery (PAJNS) is in its 13th year of publication, distributed to many neuro/spinal surgeons all over the world. We have also published 6 supplements which I believe was of great benefit to our readers. We would like to take this opportunity to thank all our contributors for their generosity and support.

We would also like express our sincere gratitude to all our reviewers who have helped in editing and reviewing papers on our behalf.

Well known figures are selected to be part of our Editorial and Advisory Board with the philosophy of having as many local, regional and international members in order to broaden our horizons further. We would like to take this opportunity to thank those Editorial and Advisory Board members who have retired, for their marvelous support and we would like to welcome the new members.

We believe that we have managed to successfully disseminate state-of-the-art neurosurgical knowledge to our readers. The PAJNS has also encouraged Pan Arab neurosurgeons to present and exchange their experiences together in meetings and courses which has helped us to promote the Pan Arab Neurosurgical Society in the world. I am pleased to see Pan Arab neurosurgeons broadening their horizons by participating in various training activities of the WFNS as well as being actively involved as members of different WFNS committees and other international neurosurgical organizations.

All in all the Pan Arab Society and Journal has promoted neurosurgery in the region and triggered the establishment of more local and regional societies. We need all kinds of efforts and collaboration from all Pan Arab Neurosurgeons to maintain a high level of professionalism and communication in order to keep our role in the world of neurosurgery as active and professional as possible. In short, any intercolleagual disputes ought to be kept within each concerned association or society in order to avoid unnecessary conflicts among colleagues as result of spreading rumours.

Prof. Khalaf Al Moutaery

Editor-in-Chief

Pan Arab Journal of Neurosurgery
